

Family Law in the UK, (as well in as in other countries) does not operate as any normal person would expect, justly and fairly, no one who has had direct experience of either Private Family Law (Disputes between Parents over Contact) or Public Family Law (Matters involving Social Services) will tell you the system works in fact they will say it does more harm than good.

Apart from supporting Family Law Advocacy The Advocacy Fund is committed to the reform of Family Law in the UK and in other countries, so that the Trauma that people experience in these proceedings are transparent, fair and just and not only the Millions of People in the Nations of England, Scotland, Wales & Northern Ireland but in other countries can smile and say "WE FINALLY HAVE A FAMILY LAW SYSTEM WE CAN TRUST!"

But we need you to support that work!
